Profile overview

He has extensive experience working with executive management in assessing the current and future business needs of client organizations and providing detailed strategies tailored to their specific requirements.

Taabish is a specialist at evaluating the effectiveness of business and manufacturing processes and offering recommendations for improvement that increase a company's financials. He has a proven record serving financial institutions as well as clients in the utilities and automotive industries.

Select client experience

Taabish has over a decade of experience delivering strong results for clients including:

- using a client-centric approach to evaluate and redesign all front and back-office operations to improve customer satisfaction while delivering measurable improvements to employee satisfaction and productivity
- developing a scalable, data-driven approach to process improvement leveraging skills and toolkits, automation, and process analytics, yielding 10 percent productivity improvements
- acting as a Centre of Excellence manager being responsible for the ongoing program execution of an incentive-based performance management that drove over \$11 million in benefits over 3 years
- automating weekly reports for a company's GTA business unit resulting in on-demand reporting capabilities and reduced production time creating significant savings

Of interest...

- Prior to joining Farber, Taabish was a Director in the Operations Optimization group at the Royal Bank of Canada. He was responsible for the design and roll-out of a new fact-based process transformation approach across the Canadian Banking Operations while also running the Centre of Excellence for a performance management and incentive program.
